Passcode: 000111

Literature. The number within brackets indicate the readings to be made before the activity (except for the introductory lecture). After the schedule in this document, you find the literature list. Note that additional (mostly voluntary) papers are to be added, and made available through Canvas or links.

The course relies on a “flipped classroom” methodology where the readings provide with a basis for discussions and workshop activities at the scheduled activities. A short note/reflection should be brought to the activities as part of the preparation (except for the course introduction) and uploaded on Canvas (except for the introductory lecture). Occasionally a post-activity reflection may also be required.

There are three larger assignments to be made and graded: 1) A qualitative study report; 2) a quantitative study report, and; 3) a systematic-like review and essay. The latter will have the greatest weight in the grading. Additionally, there will be deliveries (shorter notes and reflections) that are not graded, but compulsory for pass.

Other important notes regarding the grade for pass is that you should have delivered your reflections on time before scheduled activities and have 80% presence on scheduled activities.
