LITERATURE AND LITERATURE SEMINARS

We will have four literature seminars each focusing on the "theme" of the coming week. There will be compulsory literature to read and there will be a list of additional readings. We expect you to carefully read the compulsory literature and to be able to discuss it with your peers. The additional readings are for the benefit of your own curiosity during this course or perhaps in the future. The literature will be available on canvas.

The four literature seminar aims at "theoretically" prepare you for the specific task that you will perform the following week, but the literature is also aimed at feeding into your overall assignment – to design an approach to site transformation and to implement it on the *Lokstallarna* site.

The literature seminars will be executed as discussions in smaller groups and you will be handed a set of questions that we ask you to reflect upon together. We also ask of you to write a response (max 200 words) to ONE of the questions using the literature you have been studying. Your response is due prior to the seminar. More info will be available on canvas first day of the course.

Literature to "scan" first day of the course!

Lystra, M. (2014). McHarg's Entropy, Halprin's Chance: Representations of Cybernetic Change in 1960s Landscape Architecture. *Landscape Architecture, Studies in the History of Gardens & Designed Landscapes,* vol. 34**,** pp. 71-84.

Dunne, A. & Raby, F. (2013). *Speculative Everything: Design, Fiction, and Social Dreaming.* Cambridge, Massachusetts: MIT Press.

Literature seminar 1 "What is site and site-specificity?"

Diedrich, Lisa & Dahl, Caroline (2016). Ile de Nantes 2000–2010: a method for the meantime? *Journal of Landscape Architecture*, vol. 11(2), pp. 72-83. DOI: 10.1080/18626033.2016.1188576.
