

Schedule DVD-course 2021 (version 2021-02-24)

All communication and information for the course will be done using CANVAS. The course homepage will not be updated.

A recommendation of what to do each day is provided below, however these of course have to be adapted to the different situation of societal regulations and your own health status. Note however that some content and assignments will be uploaded step by step during the course since it is not possible to fix all these things before the course start. There are some outdoor parts of the course to be able to fulfill the course syllabus. There is no strict timeline for these outdoor parts, only suggestions and it is fine to complete these part after the last date of course. It is also important that when doing the outdoor parts your transportation into nature and greenspaces should in first hand be without using public transport e.g. walk, bike or if possible go by car. Also when being outdoor keep yourself on a fair distance from other people. If the government restricts outdoor undertakings related to Personal Reference Landscape Library and Prototype task, these outdoor parts should be completed when these regulations have been removed.

INTRO AND START OF PROJECT

Wed 24 March. Be sure to inform yourself about the course structure and material on Canvas. Join the live course introduction on **Zoom at 10.00** (BW, AG). At 13.00 Live lecture on Zoom "Some perspectives on biotope design" with Allan Gunnarsson (AG). Suggested reading Chapter 1 in text 1. Start working on Literature task 1.

<https://slu-se.zoom.us/j/62940513280>

Meeting ID: 629 4051 3280

Passcode: 835019
