Lecture 21: Global development policy – critical social science perspectives

- **In Dambisa Moyo, 2009 "Dead Aid – Why aid is not working and how there is another way for Africa":** Chapter 1 "The myth of Aid" pp 3-9
This book is written by a female, Zambian economist and this chapter provides Moyo's critical perspectives on aid and why she argues it is not working. Do you think there are counterarguments to challenge her very critical stance?
Chapter 2 "A brief history of Aid" pp 11-28
This chapter provides a brief background to the institutional landscape of foreign aid that, although it has changed in some ways, is still dominating today.

- **Howard Stein (2021) Institutionalizing neoclassical economics in Africa: Instruments, ideology and implications, *Economy and Society*, 50:1, 10.1080/03085147.2021.1841937**
In this paper, you can read about how neoclassical economics underpin the past few decades of foreign aid (and global development in general) starting with the Structural Adjustment Programmes promoted by the International Monetary Fund and the World Bank. These discussions also link to debates on aid conditionality and the the potential of development policy to achieve poverty reduction.

- **In Eriksson Baaz, 2005 "The paternalism of Partnership":** Chapter 4. The omniscient self and the backward, passive and unreliable partner (pp 109-148)
This chapter provides some ethnographical descriptions of the world of development practitioners and their view of the supposed "beneficiaries" of development collaboration. It touches on aspects of democracy, equality, "the other" and identity. This book is nearly 20 years old. Do you think some aspects have changed today or is her analysis still valid?

The Sustainable Development Goals prioritize economic growth over sustainable resource use: a critical reflection on the SDGs from a socio-ecological perspective. *Sustainability Science*, 15, 1101-1110.**
In this paper, you can read a social ecology analysis of the Sustainable Development Goals, the SDGs. The SDGs have considerable influence on Swedish and global politics, development policies and research. But, to what
